STONE CRUSHER

# STCH - STCH/HD

from **180** to **350 HP** | Ø **20 in max** (stones) | D**10 in**

## STONE CRUSHER WITH FIXED TOOTH ROTOR.

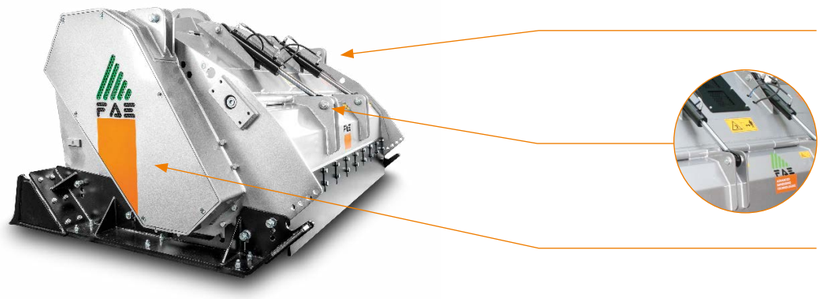
The STCH is designed for the toughest applications. With multiple working widths available, it can crush stones up to 20" in diameter. The largest model, STCH-250, allows you to reclaim unprocessed land containing stones. The Heavy Duty (HD) version of the STCH has upgraded teeth and additional layers of Hardox® steel to ensure a longer working life for this attachment.

| STANDARD EQUIPMENT |
|---|
| PTO shaft (STCH/HD) |
| Cam clutch on side PTO (STCH/HD) |
| PTO shaft with cam clutch (STCH) |
| Gearbox with freewheel |
| Transmission with belts in XPC |
| Hydraulic hood |
| Flat pressed welded steel counter-blades |
| Adjustable Hardox® counter-blade |
| Inner anti wear plates Hardox® (STCH/HD) |
| Adjustable skids |
| Penetration skids |
| Adjustable extended 3 point linkage (STCH/HD) |
| Enclosed machine body |
| Inside lateral protection |
| Dual row protection chains |

| OPTIONS |
|---|
| Hydraulic top link |
| Dozing blade |
| Grader blade |
| Multiple tooth options (STCH/HD: STC/3/HD tools standard) |

**KING OF CRUSHERS**
THE BEST PROCESSED MATERIAL

## FEATURES



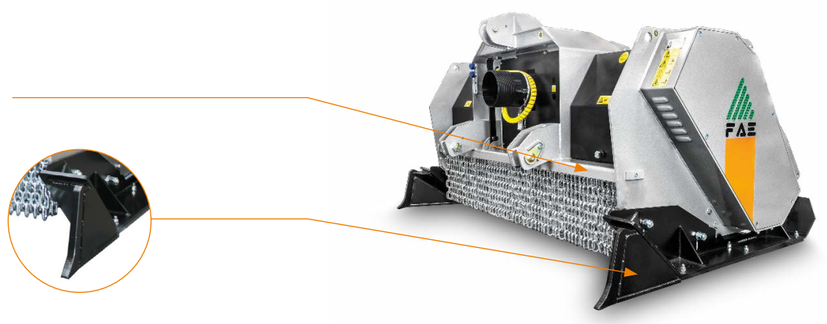
**Enclosed machine body**
protects internal components

**Hydraulically controlled hood**
adjusts final product size

**Transmission with belts in XPC**

**Adjustable Hardox® counter-blade**
effectively control the final product size

**Skids with interchangeable Hardox® skid plates and penetration points**
help the machine better penetrate the ground



## MAIN OPTIONS

1 **Grader blade**
for grading and compaction

2 **Hydraulic top link**
to achieve and maintain depth

| MODEL | Engine (HP) | | PTO (rpm) | Working width (in) | Total width (in) | Weight (lbs) | Max shredding diameter (in) | Max working depth (in) | No. teeth type | |
